Miss Landon, who has lately returned from the continent, thus alludes to her journey :—

For now I find in foreign scenes
What foreign scenes can be,
And truth with fancy intertwine,
To bring them home again.
A few short miles, a few salt waves,
How strange a change there came—
Our lives as separate as our graves;
Is then our kind the same?
Ah, yes; a thousand sympathies!
Their general birth-place find,
And nature has a thousand links
To beauty and bind.
I deeply felt that song should make
One universal link,
Uniting, for each other's sake,
All those who feel ad think.

—I call each fond wish back!

* * * * *
Peace!—I will dash these fond regrets to earth,
Even as the eagle shakes the cumbersome rain
From his strong plume.

Take! oh take these books away!—
They were received from kindly hand,
They were looked o'er with sunny eyes,
And with expression dear and bland.

I may not now the theme translate,
I may not now the song arrange,—
My pen, it doth refuse to trace
The varying hopes whose soul could change.

Those eyes, I will not meet their glance—
That know it insincere—
Those gifts are valuable to me—
The heart is changed which made them dear!

Abgar is a name familiar to us from his connection with the history of our Saviour. The circumstance of his sending letters to Jesus Christ, and his subsequent conversion, are thus related by Prince Hubboff:—

"The deputies of Abgar, having both heard of the miracles performed by Christ, and themselves been eyewitnesses of them in Jerusalem, came and gave information thereof to Abgar. When he heard of these miracles, his heart was strongly impressed with the conviction that Jesus must be the true Son of God. At that time he labored under a severe disease, which had afflicted him during seven years, and no one could heal it.—But he waited in faith and hope for a cure from Christ; and not being able to go himself, he sent Ananias in his stead, as ambassador to the Saviour, with a letter to the following purport:—'Abgar, son of Arsham, and king of Armenia wishes health to the benevolent Saviour Jesus, who has appeared in the country of Judea. I have heard of thee, and the cures wrought by thy hand; for it is said that thou restorest sight to the blind, causest the lame to walk, cleansest those afflicted with leprosy, castest out unclean spirits; and, however long continued the disease under which a person may have labored, thou healest it, and also raisest the dead to life. When I had heard all these things concerning thee, I concluded either that thou wert God himself come down from heaven, or else the Son of God. Therefore I have now written unto thee, beseeching thee to come and heal the disease by which I am afflicted. I have also heard that the Jews are rising against thee, and seeking to kill thee; but there is a small beautiful town here, which will suffice for us both,' &c. He sent gifts by the hand of his ambassadors to the Lord in the temple, and ordered a painter by the name of Ivaness to accompany them. Perhaps this Ivaness was in reality Anane himself; for it is said he also was a painter. Abgar instructed these persons, that if the Saviour would not vouchsafe to visit him, they should at least take his likeness, in order that they might place it before him to heal him of his disease. The messengers arrived in Judea on the day of Christ's triumphant entry into Jerusalem. Their desire to see Jesus is mentioned by the holy Evangelist John, chap. xii. v. 20:—'There were certain Greeks among them that came up to worship at the feast. The same came therefore to Philip which was of Bethsaida of Galilee, and desired him, saying, "Sir, we would see Jesus." Philip cometh and calleth Andrew, and again Andrew and Philip told Jesus. And Jesus answered them, saying, "The hour is come that the Son of Man should be glorified."

Truly the hour was come for praising the most glorious Son of God. That hour of universal joy was at hand, in which he would redeem the most holy bride by his blood, and attach himself, by his sufferings on the cross, to the holy virgin church. He longed for this time with inexpressible ardor, in which he intended to display his infinite love to mankind by the extension of his world-creating hands upon the cross. Jesus Christ ordered the apostle Thomas to write an answer to Abgar, to the following effect:—'Blessed are they who have not seen, and yet have believed. Those who see me will not believe in me; but many of those who do not see me shall believe and live. You wish that I should go to you—but it behoves me to perform in this place all those things for the sake of which I have been sent to Jerusalem. When I have finished them, then I shall ascend to him that sent me. After my ascension, I shall send thee one of my disciples, who will heal thy disease, and bestow eternal life upon thee and those that are with thee.' The painter aforementioned made many attempts, but without effect, to draw a correct likeness of our Saviour. But Jesus being willing to satisfy the desire of Abgar and of the painter, took a clean handkerchief, and applied it to his divine countenance. In that same hour, by a miraculous power, his features and likeness were represented on the handkerchief. Hedren says, that 'He affixed his seal to the corner of it in seven letters, representing these words, "A miracle performed by God." Jesus gave the handkerchief to the ambassadors of Abgar, that they might deliver it to him along with the said letter.

After the ascension of Christ, Thaddeus went to Edessa, according to our Saviour's command, and healed Abgar of his sickness. He also baptised him and the rest of the inhabitants, who all became true believers. Abgar placed the most holy image made without hands, with great veneration, in a gilded case, and on the frame cut these words: 'He who trusts in the Lord shall not be disappointed.' This first believing king ordered that the entrances to the idolatrous temples should be blocked up for ever, and that the idols carved out on the walls and pillars should be destroyed. He overturned the unclean statues of the Grecian deities which he found on the gates of Edessa, and put up the above-mentioned image in their stead, for the adoration of the passers-by. He also built a magnificent church, and called it by a certain name, which signified 'The falling asleep of the mother of God.' Being desirous to extend the religion of Christ, he addressed the Roman emperor Tiberius on the subject, by letter, advising him to revenge the death of Christ upon Pilate and the Jews, and that he should himself believe in Christ. Tiberius returned an answer, that he was willing to believe; but that it was a common rule among the Romans to acknowledge no one as a deity until approved of by the senate. He even endeavoured to persuade Artashes, king of Persia, to adopt the Christian religion. Indeed, during the space of nearly forty years, he ceased not to exhort every one with as firm a faith as if he had himself been an apostle of Christ.'

The following is an account of the miraculous preservation of the city of Edessa from the besieging force of Khosrov.

"In the reign of the Emperor Justinian, the city of Edessa was besieged by Khosrov, king of Persia; but being informed that the city must of necessity remain unhurt, because it had received a blessing from Christ the Saviour, and could not be conquered by its enemies, he was much grieved, and set about contriving various methods to destroy the wall. But the affrighted inhabitants turned to God for help. That same night there appeared to Bishop Evagh, a certain beautiful woman, who stated that under the town gate was an image of Christ the Saviour suspended on the wall.—Take it," said the woman, "from that place, for by it you shall obtain deliverance." On removing the wall the bishop actually found the image; and beside it was the lamp that had continued burning since the time of Adesus the patriarch, a space of 505 years! The bishop received this image with joy, and hastened with it to the very place where the unbelievers had already dug under the walls, below which they were in the act of placing fires. He let fall a drop of the oil that burned in the lamp upon the enemy's fire, and in a moment the flame burst forth, spread itself in all directions, and consumed the enemy, who endeavoured in vain to reach the Christians. By these and the like miracles, the enemy suffered great damage, and were at last forced to take refuge in flight."

FOR POSTSCRIPT, SEE NEXT PAGE.

We invite the attention of the Democratic Party to the following spirited article upon its future duty, and the manner which is suggested for performing that duty. We urged, some weeks ago, the necessity of a re-organization of the party, by the members of the Legislature, or a State Convention, and the importance of a more efficient action. The Legislature being now in session, a convention of its Democratic members, united with such as may be elected to join them from towns not represented by gentlemen friendly to the party, can easily be held, and the wishes of the whole party expressed, and such measures taken for their fulfillment as the general voice may determine:

From the Salem Commercial Advertiser.

Apathy in the Democratic party is submission, and induction a crime. Patriotism should banish the one, and the love of liberty destroy the other. While almost every other State in the Union is throwing off the shackles of antiquated customs, subservient to the interests of the whole people, Massachusetts yet remains firmly grasped in the hands of the aristocracy—which they never will relinquish until a resolute and vigorous onset is made by the friends of equal rights—which shall shake the strong holds, uproot the foundations on which their strength repose, and by which they are enabled to sustain themselves in their unlawful exercise of power.

It is no time for Democrats to talk of palliating evil, or mitigating oppression. The enlightened spirit of the age calls for more enduring efforts—to pierce the very vitals of the aristocracy, and demand the introduction of a system of legislation which shall effectually banish the cry for monopolies, and quench the thirst for exclusive privileges. While our sister States are shouting victory, and taking the proud pre-eminence in reform, the people of Massachusetts are still content to creep like insects, and suffer heartless demagogues to veil their eyes to the reform actually in progress in other sections of the country.

No sooner does the voice of patriotism venture to speak independently, and admonish the people to sustain their true dignity and their immutable rights as freemen, than the cry of infidelity is raised by the opponents of correct principles, to intimidate the people and prevent their united co-operation in the work.—How deeply pious must those be who never feel the inspirations of the christian religion, nor advocate its doctrines, unless demanded to relinquish their hold on their unlawful privileges, and relax their grasp on the people! ■

Shall Democrats sit still and fold their hands in indolence, and make no attempt to emancipate themselves, to dispel the mists which ensnare the minds of the people? Make no effort to subdue the power of monied monopolies? Let the Democratic party make a new and thorough organization. We have been too remiss in this duty, and suffered the Bank party to outdo us in calling together the whole strength of their party. Had we been as assiduous in this respect as the Bankites, we might now enjoy the satisfaction of viewing the triumphs of correct principles and the discomfiture of its enemies. Had the plan to organize the Democratic party (which was proposed by a gentleman at the State Convention) been carried into execution, truth ere this time would have gained the ascendancy, and the advocates of monopolies shrank before the withering gaze of an indignant people. Let something be done, and done immediately. Let there be a State Convention, composed of delegates from every town in the State—to express their views and interchange feelings and opinions in regard to the great object of their interests. Let their principles be avowed and the motives which actuate them be unaffectedly laid before the people. Let a just exposition of the great political questions which divide the parties be exhibited to every man in the Commonwealth, and its importance duly enforced. Arguments drawn from the fountains of truth are our only weapons in prosecuting this holy warfare. The vaults of the Bank are not open to us, nor have we at our command treasures to lavish in procuring electioneering pamphlets to spread among the people. The Bankites possess all these advantages, as we have lately seen by the report of the Committee on Finance to the U. S. Senate. But with truth for our panoply, and integrity for our support, we may yet accomplish the regeneration of Massachusetts.

Had we been as industrious in propagating truth as our opponents have been in spreading error and base fabrications, this Commonwealth would have been long before this time restored to an honorable station among the neighboring States—instead of continuing a reproach and bye-word to the nation. But a thorough organization of the party is necessary to success—which can easily be effected by means of a State Convention. We are not strenuous about the means of bringing about this muted action of the party; and if any other method than a State Convention can better effect it, we should rejoice to see it in operation. But let it be done and that immediately. Let it not be said this is an unseemly time. The longer we wait, the stronger hold the enemy acquires—and the more laborious will be the struggle to root it out.

If we wish for success we must exert all our power to obtain it, or we shall utterly fail. Let every Democrat who has the good of his country at heart, dive himself of all local prejudices and unite hand and heart in one grand effort to overthrow the power of the aristocracy.

Union is strength, and on that alone can we rely with safety, for the effectual dissemination of truth. And to effect this union of principle and purpose we must have recourse to a complete and thorough organization of the party, so that all shall act with one accord, impart harmony, and give an energetic impulse to the whole. Victory would certainly be the result. For truth is properly enforced is always victorious.

Mr Rantoul made a very forcible speech yesterday in the House of Representatives against granting acts of incorporation, which threw the soul-less bodies of those interested in monopolies into great agony. Mr Parsons was so much frightened that he was afraid of being devoured by Beasts from Berkshire, and Mr Motley so alarmed that he was rendered incapable of understanding correctly what Mr Rantoul said, and so deaf that he could not hear him when he explained—The stand taken by Mr Rantoul, and those who agree with him, upon this subject, is one which will be sustained by the people. Two-thirds of the incorporations now in existence are mere speculating, stock-jobbing concerns, and the necessity of putting a stop to their increase is almost universally felt; at least, a determination exists in the community to examine the general utility of those in operation, before another batch is launched upon the public.

The Hon. Andrew Pierce has declined being a candidate for the office of Governor of New Hampshire, for which he was nominated by the Whig Convention of that State.—*Atlas.*

The Bankites in New Hampshire are not numerous enough, it seems, to encourage Mr P. to accept their nomination—their talk about "revolutionizing the State" is a mere tempest in a teapot.

M. Zavala, the late Mexican ambassador to France, has published at Paris, in the Spanish language, his Travels in the U. S. States.

Further Extracts from the Suppressed Journal.

Sat in my parlor and received all the world this morning, and have, in consequence, spent the afternoon in one uninterrupted gape. The subjects of conversation were interesting—"How do you find our climate, Ma'am?"—"Very charming, Sir." "I am told you have nothing but fogs t'other side." "Nothing." "My! I can't realize that." "You exercise a great deal, Miss—." "Do you mean that I take exercise?"—"I guess I do—our ladies don't fancy showing themselves about so much. They sit at home and fix their chambers. We don't want our girls to act like the London and Paris misses. We teach them other acquirements, and get Mr — to give them a quarter's music." "Your notions of education seem extremely liberal." "I guess they don't seem so to you, Ma'am." This is a literal conversation with Mr —, a rich gentleman, father of a numerous offspring of marriageable daughters. Next in course entered a couple who have been engaged for three years, and seemed heartily sick of one another. There is certainly little delicacy in this American practise of proclaiming an engagement to the world. The happy couple are henceforward mutually devoted—ride—walk—sit alone—if the engagement is broken off, as it frequently is, the next favored swain quietly assumes the place of the departed. A wedding is consequently an affair of little interest—the lady, with the greatest composure, receives her five hundred particular friends immediately after the ceremony—sups—and instead of going off after the exhibition, they, in the most primitive manner, remain where they are, and receive company for two or three days after! Command me to sweet simplicity—I know I should be envied in England, but it is a fact, by my unbroken truth! * * * Tomorrow I am going a sightseeing—one comfort in this blessed land exists in the circumstance that there is little to see.

Imprimis.—I was taken to the top of Bunker's Hill, called so, I believe from being the property of some Steamboat Captain of that name who some time since commenced the erection of a Monument upon his ground, in commemoration of some skirmish which took place in its vicinity in the Revolutionary War, of which the Captain is very proud—the immediate inhabitants participate in the Captain's patriotic feelings, and my *cicerones* were terrible angry because I had never heard of it—after all, it appears that we beat them, but they showed fight. Went to Cambridge—the literary emporium—visited the library, and was bored to death by the would-be *sarans*. I thought that K—, and S—, and J—, had more learning in their wigs, than these pedants have in their whole united periclimenes. Visited the Navy Yard, escorted by my friend of tandem memory. The dry dock is said to be very fine—being no judge, I can't pretend to give an opinion—visited every hole in every ship, and above all the *Constitution*, which, they say, beat a British ship—with the good taste which distinguishes the natives of this country, they presented me with a piece of the wood. Next went to see a glass manufacture, and then having shown a proper and laudable curiosity, and gratified my thirst for knowledge, I returned home. Found my little friend Miss — waiting for me. She is one of the few girls here with a good complexion—they are certainly the most thin and colorless set of mortals I ever beheld; there is another exception, however, in Mrs —, once a reigning belle—now retired from the world. Society is entirely made up of little, pretty, unhampered girls, without accomplishments or conversation, yet who conduct themselves with perfect independence, and young, unfeigned boys, who in Europe, would be shut up with their tutors. These take the lead, driving the married women out of the field. One may be an intimate acquaintance with a young lady without discovering that she has a mother. The consequences of this freedom are precisely what might be expected. I agreed with — that should I marry here, I shall teach them a different lesson.

From Mexico.—The ship Congress, at New York, brings Vera Cruz papers to the 4th inst. A decree has been issued in Puebla by the oldest Counsellor, exercising provisionally the gubernatorial power, who declares that the laws issued by the General Congress relative to the suppression of monastic vows, benefices and tithes, are our only weapons in prosecuting this holy warfare.

The vaults of the Bank are not open to us, nor have we at our command treasures to lavish in procuring electioneering pamphlets to spread among the people.

The Bankites possess all these advantages, as we have lately seen by the report of the Committee on Finance to the U. S. Senate. But with truth for our panoply,

and integrity for our support, we may yet accomplish the regeneration of Massachusetts.

This may be true, but it is not the case. The Boston Post turns up his honorable nose at two houses being sold in this city, one for \$27,000 and the other for \$30,000, and says a young merchant of that place has built a mansion which cost more than both those houses. Very probably. We have several houses in this city worth more than \$60,000.—Noah.

Sixty thousand, Major? That won't do—we have 'em that cost a \$100,000. Try again, king of Israel.

Tremont Theatre.—Smith, a general favorite, takes a benefit this evening, on which occasion he will deliver the Prize Address to the Fire Department of Boston, written by Mr F. S. Hill, of the Warren. Smith always has a good house at his benefit, and generally does up his business in good style.

Francesco Urbani, the confidential valet of Paganini, arrived in New York some time since from Europe, for the purpose of closing a marriage contract for his master, with Miss Watson, who, just before leaving England, eloped with him, and was rescued by her father. Mr Watson refused to hold any intercourse with Paganini's agent, who consequently embarked for Liverpool on the 16th ult.

The Wandering Piper is in Mobile—the papers there relate the old story about the bet, &c., with as much gravity as it was told here, some years ago.

Our Readers in the South Western part of the city must excuse any temporary delay in the reception of their papers for a day or two, as our carrier for that section is sick, and a new hand has taken his place.

The Editor of the Bee is elected State printer by the Legislature of Louisiana. He is a friend to the Administration.

The late Mr Turpin, of New York, bequeathed \$50,000 to one of his colored male domestics.

An audacious Robber.—On Friday night, some, as yet undiscovered, rogue entered the lodging room of Major Emmons, of Hinsdale, at a public house in town, while he was asleep, and absconded from his pocket-book \$29. The Major was on a return trip from Boston, and has met with a series of disasters. At Westborough, his trunk was picked up by an Irishman and carried off, but soon recovered. He was desirous to inflict summary justice on the spot, but the driver interposed. At Ware, his demijohn was broken, and its contents lost.—*Northampton Gaz.*

The New York Commercial Advertiser says "great apprehension is felt for the safety of the pilot boat Marion, of Baltimore, of which nothing has been heard since the 3d of January. She had on board seven pilots and four boys. She was on a cruise off Cape Henry during the late severe weather."

Distressing Deaths by Poison.—A more melancholy circumstance than that mentioned below we have seldom had to record. On the last day of December, a member of the family of Eber Wheaton, Esquire (Assistant Justice of the 1st, 2d, and 3d Ward Courts)

were interesting—"How do you find our climate, Ma'am?"—"Very charming, Sir." "I am told you have nothing but fogs t'other side." "Nothing." "My! I can't realize that." "You exercise a great deal, Miss—." "Do you mean that I take exercise?"—"I guess I do—our ladies don't fancy showing themselves about so much. They sit at home and fix their chambers. We don't want our girls to act like the London and Paris misses. We teach them other acquirements, and get Mr — to give them a quarter's music." "Your notions of education seem extremely liberal." "I guess they don't seem so to you, Ma'am." This is a literal conversation with Mr —, a rich gentleman, father of a numerous offspring of marriageable daughters. Next in course entered a couple who have been engaged for three years, and seemed heartily sick of one another. There is certainly little delicacy in this American practise of proclaiming an engagement to the world. The happy couple are henceforward mutually devoted—ride—walk—sit alone—if the engagement is broken off, as it frequently is, the next favored swain quietly assumes the place of the departed. A wedding is consequently an affair of little interest—the lady, with the greatest composure, receives her five hundred particular friends immediately after the ceremony—sups—and instead of going off after the exhibition, they, in the most primitive manner, remain where they are, and receive company for two or three days after! Command me to sweet simplicity—I know I should be envied in England, but it is a fact, by my unbroken truth! * * * Tomorrow I am going a sightseeing—one comfort in this blessed land exists in the circumstance that there is little to see.

Davy Crockett's description of a Railroad.—"Our passage down the Chesapeake was very pleasant, and in a very short run we came to the place where we were to get on board of the railroad cars.

This was a clean new sight to me; about a dozen big stages hung on to one machine, and to start up hill. After a good deal of fuss we all got seated, and moved slowly off; the engine wheezing as if she had the tizick. By-and-by she began to take short breaths, and away we went with a blue streak after us. The whole distance is seventeen miles, and it was run in fifty-five minutes.

While I was whizzing along, I burst out laughing.—One of the passengers asked me what it was at. "Why," says I, "it's no wonder the fellow's horses run off." A Carolina wagoner had just crossed the rail-road from Charleston to Augusta, when the engine hove in sight with the carts attached. It was growing dark, and the sparks were flying in all directions. His horse ran off, broke his wagon, and smashed his combustible into atoms. He ran to a house for help, and when they asked him what scared his horses, he said he did not know, but it must be hell in harness.

A Chapter on Rascals.—Among all the rascals in a large city like this, the most genteel are the rascally lawyers—we mean those who, without character, or property, and with little education, rent a small room in the upper story of a building, and eke out the necessities of life by fishing money from the pockets of the ignorant whom they prevail upon to embark upon the deceitful waves of litigation. They have an undue advantage over their fellow rascals, and they are rascals of the first water: for what little legal knowledge they possess enables them to be rascals "according to law."

An honorable lawyer is, in every sense of the word, an honorable man, and an ornament to society, but a lawyer like those above described, is a thorn in the side of the community—a two-legged shark—a land pirate—a sort of human hyena, who seduces his neighbor into the meshes of the law, by holding out to him hopes of success, robs him of his money, and then leaves him to extricate himself as well as he can.—*N. Y. Sun.*

Days without breeches.—When the ultra-revolutionists of France abolished the Christian era, and limited the months to thirty days each, there were necessarily five supernumerary days to be thrown in at the end of each year, to make up the whole. These they named "*Sans-Culottides*," days of the Sans Culottes—or, as it might be rendered by a liberal translation, days without breeches!

These days were all consecrated to certain festivals: the first was kept in honor of *Genet*: the second, of *Labor*: the third, of *Deeds*: the fourth, of *Rewards*: and the fifth, of *Opinion*—and for all these things the unbreeched days were perfectly free.—*N. Y. Trans.*

Building in New York.—From a communication from the City Inspector informally brought before the Boards of Assistants last evening, it appears that there have been erected within the past year *eight hundred and eighty-three buildings*, nearly all of brick or stone, which are divided among the different wards as follows:

1st Ward, 43, (all but one of them stores) 2d, 32; 3d, 11; 4th, 11; 5th, 20; 6th, 37; 7th, 43; 8th, 36; 9th,

12th, 10th, 49; 11th, 209; 12th, 122; 13th, 40; 14th,

25; 15th, 75. Of the whole number, 380 were two

story brick dwellings, 122 three story do., 84 four story do., 2 five story do., 58 two story brick from dwellings, 67 two story wooden dwellings; 28 two story brick stores; 17 three story do., 17 four story do., 63 five story do., 10 six story do., 1 stone church, 1 wood do., 1 brick synagogue, &c. Is understood that the numbers here given are below the truth; the returns being incomplete.—*Jour. Com.*

The Boston Commercial Gazette, in remarking upon the late trials for the choice of a Senator by our legislature, concludes by observing—"The election has been postponed till next spring, when there will be a decided whig majority in the new legislature." We should be glad to know where the Gazette gets its information. Is it from the Journal, who so boldly declared they would elect their Senator? Alas! if that is all you depend on, Mr Gazette, you will be woefully out of your reckoning.

There is not a man in Rhode Island acquainted with politics, as we verily believe, who entertains a doubt as to the next election—or that the Jackson and anti-slavery party will be elected by overwhelming majorities.—*Prov. Her.*

A bank has been established at Rome. M. Drouille has advanced a large sum and the bank was progressing rapidly in business. The clerks were all French. Don Miguel had deposited a quantity of diamonds at the bank as security for a sum he wished to borrow. A new coin has been issued upon which the features of the Pope are preserved with great accuracy.

The sudden death of the late venerable Sergeant Wallace, who was buried on Sunday with military honors, has occasioned a suspicion that he had been poisoned.

It was known that he had saved some money, but none having been found where he kept it, his friends, previous to his interment, employed surgeons to remove his bowels, which have been placed in the hands of Dr Chilton, for analization.—*N. Y. Gaz.*

A committee of the Alabama Legislature have reported in favor of chartering a company to construct a railroad from Mobile Bay to Tennessee River. New Orleans is quite sensitive on the subject, as this great work would divert from her a large portion of her present inland commerce. A loan of one million of dollars will be required on security of real estate.

Fire in Barnstable.—The store of Mr Joseph W. Crocker in Barnstable, was destroyed by fire on the morning of the 22d inst. together with his entire stock of goods—whole loss \$4000, \$2500 insured in Boston. The fire is thought to have been the work of an incendiary.

North Carolina Gold.—At Reed's mine, Cabarrus county, in that state, where was found the lump of gold weighing 28 pounds, the first discovery in that State, there have recently been found three more large pieces, weighing 23, 20 and 10 pounds.

MASSACHUSETTS LEGISLATURE.

In Senate, Thursday, Jan. 29. The business was rather unimportant.

Thursday next at 12 o'clock, was assigned for the choice of a Senator to Congress.

In the House of Representatives.—Sundry orders from the Senate relative to the disposal of the documents accompanying the Governor's message, passed in concurrence.

Bill to incorporate the Boston Asylum and Farm School, passed to second reading in concurrence.

Petition of Edward Berry et al. to incorporate a Fire and Marine Insurance Company in Marblehead. Referred.

Sundry other petitions presented and referred.

On motion of Mr Leonard, the Clerk was charged to request of the Senate the transmission of the petition of William Vans, and the accompanying papers to the House—where, on being received, after some discussion, it was referred to a Committee, consisting of Messrs Leonard, Bigelow, Newell, Rantoul and Lee.

The debate on the passage of the bill to incorporate the Boyden Iron Company, was renewed and continued till 2 o'clock. It was then ordered to lie on the table till the committee on the subject of limited partnerships shall have reported.

Mr Parsons moved a re-consideration of the vote, but on consideration of the lateness of the hour, he withdrew the motion and the House adj.

RODGERS' IMPERIAL STOCKS.

6 Joy's Building, up stairs.
(Opposite the Post Office, Boston.)

WILLIAM H. ROGERS, most respectfully invites the attention of Merchant Tailors and the public generally, to his new invented Imperial Stocks for the Neck, which for ease and elegance far surpass every thing of the kind hitherto manufactured in this vicinity. They are cut scientifically; the materials and manner of making are quite different from those in common use, and they may be covered many times, and retain exactly the same shape as when first made. W. H. R. requests permission to numerate the usual fadus in his new Stocks, viz 1st, the very small, 2d, the medium, 3d, their sitting close at the bottom; 4th, the edge at the top being uncomfortably tight, so to cause a distortion of the features by moving the head; 5th, those of their bulging out at the sides, by moving the head a little downwards, which has a most distasteful appearance. By W. H. Rogers' deservedly admired and extensively patronized invention, all these faults are completely obviated. Naval and military gentlemen will find them the most pleasing and durable. Made to order of any texture, by the dozen or single, at the lowest cash prices. Ladies Riding Stocks beautifully made to order. ttf—july 23

AMERICAN LADIES' MAGAZINE.

EDITED BY MRS. SARAH J. HALE.

PROSPECTUS.—Vol. VIII.—In reviewing the success of our work for the seven years it has been issued, we have certainly much reason to be gratified. Never till the present time have we had cause to complain—but the depression was last winter, just at the season when we obtain most of our subscribers, and a very injurious effect—we lost about five hundred names.

The new year brings the responsibility of beginning a new volume. The Editor has become part proprietor of the work, and it is indispensable that a large addition to our subscription list be obtained, to enable us to sustain the Magazine, and make such improvements as the importance of the objects we advocate demand.

We rely on our friends for aid in obtaining names. Will not every lady and every gentleman, who take an interest in the cause of female education, endeavor to send us one subscriber? We ask these favors cordially. Our object is to make the periodical, devoutly—devoted to the mental, moral, and religious welfare of Woman. We have the assistance of many of our best female writers. We offer a field where female genius may find scope—where the female mind may engage in its appropriate work, that of benefitting the Female Sex.

We feel that the continuance of our publication is of importance—that it will do good. Its influence is directed to promote social refinement, domestic virtues, and humble piety.—And unless intelligent ladies devote themselves to the work of education, and implant deeply the principles of our holy religion in the heart of the young, neither Christianity nor civilization can be maintained in our country.

The writer of our Magazine, however, well knows—We need only add that we have made arrangements by which we hope its interest and usefulness will be increased. We only wish for an increase of subscribers—which will amply reward them.

The work is issued on the 15th of every month.

The January number will be enlarged, and contain 60 pages, instead of 48, as heretofore.

Two elegant engravings will be given in the course of the year.

The subscription price is \$5.00 per annum, payable on delivery of the third number.

Communications intended for the Magazine may be directed to the Editor—those on business to the Publisher.
